\$25 Nonmembers

### Early Literacy and Numeracy with Jamboard!

Let's explore how little learners can make their thinking visible with Jamboard! This free tool by Google allows students to create, collaborate and SHOW what they KNOW in any learning setting. Whether you're meeting with students in person or remotely, Jamboard helps make your lessons engaging and interactive!

K-2 Can, Too! is the motto of this lead learner. Fourteen years in primary classrooms helped develop a passion for finding ways to get technology into the hands of even the littlest of learners, for the purpose of fostering creativity and enhancing education right from the start. Throughout her 20-year career in education, Susan has served as a site-level and district technology lead, and now holds the position of PK-12 Instructional Technology Coach for Fowler Unified School District. Within her district, Susan has aided in the implementation of a 1:1 program using Chromebooks and the Google Suite. She regularly works with individual and teams of teachers to promote the best practices for using technology in the classroom to enhance instruction, support and supplement content, improve assessment, and engage learners through meaningful creativity. Susan is an Google Education Innovator and Trainer, and a Leading Edge Certified Professional Learning Leader. She holds a Masters Degree in Educational Technology from Pepperdine University. Her studies there focused on engaging adult learners and developing effective professional learning programs. She continues this work as a passion, enthusiastically sharing knowledge with other educators! In addition to her responsibilities with Fowler Unified, Susan regularly speaks on blended learning and classroom technology at professional learning events and in school districts throughout the country.
